How did the fund perform last year?

On behalf of the entire team, we want to express our appreciation for the confidence you have placed in the Fund. The following information pertains to the fiscal period from November 1, 2024 through October 31, 2025.

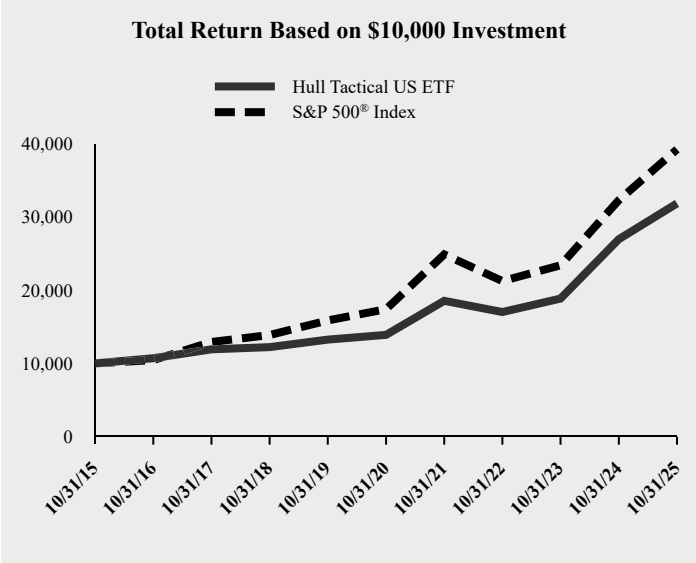

The Fund is an actively managed exchange-traded fund that seeks long-term capital appreciation through dynamic exposure to U.S. equity, derivative, and treasury markets. The Fund’s target exposure is updated daily, ranging from a maximum long position of 200% to a maximum short position of -100%. Short exposure is implemented through derivatives, allowing the Fund to express tactical views without directly shorting underlying securities. These positions typically add value during periods of market weakness and detract during strong market advances.

During the first half of the fiscal year, equity markets exhibited elevated volatility amid shifting expectations for Federal Reserve policy and tariff uncertainty. In the latter half, markets strengthened on moderating inflation data and optimism for a soft landing. The Fund’s dynamic exposure allowed it to capture much of the market upside while mitigating downside risk during corrections.

The Fund experienced positive performance during the fiscal year ended October 31, 2025. The Market price for the Fund increased 17.05% and the net asset value increased 18.11%. The benchmark S&P 500® Index, a broad market index, increased 21.45% over the same period.

We appreciate your investment in the Fund.
